Pilot Projects and Special Orders
for Foodstuffs and Additives

We do the Legwork: Pilot Projects and Special Projects for Foodstuffs and Additives

Developing new products and getting them to market launch is increasingly based nowadays on division of resources. Maximum flexibility, speed and economy are critical factors in this product development and the sustainable success of a company.

This is the point where our **partnership services** start: **we will look after all aspects of the dosage form of your product.**

Take advantage of our wide range of expert services, all provided from a single source!

As a **systems and service partner**, we offer you **added value and safety** in the following areas:

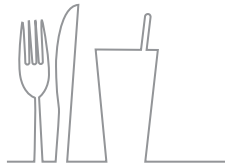

- Process technology support
- Quality control at our own microbiological laboratory
- Adaptation of quality systems with the help of JRS Quality Assurance
- Technical Centre and application technology for joint product development
- Worldwide logistics service
- Tried and tested network partner in international business

EPT – Enhanced JRS Process Technology

JRS offers unique functionality and product results, thanks to the unique and innovative **JRS Special Process Technology Modular System**. With over 135 years of experience behind us, as your service partner we can develop optimised production procedures which can then be realised using your own plant systems and equipment.

JRS offers you the ideal supplement to your existing production resources, along with the potential to outsource special manufacturing tasks and the execution of pilot projects:

- **Kosher/ halal / allergens / – special products**
- **Special processing based on specific market requirements (e.g. Japan)**
- **Big batch mixing ability**
- **Specially set-up for mixed products with low bulk weight**
- **Highest hygiene standards**
- **Stainless steel mixers for filling sacks / big bags / cardboard boxes**
- **High-bay warehouse with pest control**
- **New: jet milling and anti-dust treatment**

What can we do for you?

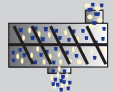

We will be happy to give you comprehensive information and advice at any time – just call us: +49 7967 152-202 or go to en.jrstollproduction.com

**JRS – Your Systems and Service
Partner of Choice for the Realisation
of Contract Manufacturing Projects**

JRS – Your powerful, reliable Industrial Partner – all over the World!

JRS, J. Rettenmaier & Söhne – is the world's leading manufacturer of isolated dietary fibres. JRS plant fibre technology is based on state-of-the-art process manufacturing techniques. The company has a pool of ultra-modern plant equipment at production sites worldwide.

JRS uses special milling and press granulation techniques, and has considerable mixing capacity. These add to its attractiveness as a service partner with other industries for contract manufacturing orders.
